

Ada Exempted Village School District

Bylaws & Policies

8510 - WELLNESS

As required by law, the Board of Education establishes the following wellness policy for the ADA Exempted Village School District.

The Board recognizes that good nutrition and regular physical activity affect the health and well being of the District's students. Furthermore, research suggests that there is a positive correlation between a student's health and well being and his/her ability to learn. Moreover, schools can play an important role in the developmental process by which students establish their health and nutrition habits by providing nutritious meals and ala carte items through the schools' meal programs, by supporting the development of good eating habits, and by promoting increased physical activity both in and out of school.

The Board, however, believes this effort to support the students' development of healthy behaviors and habits with regard to eating and exercise cannot be accomplished by the schools alone. It will be necessary for not only the staff, but also parents and the public at large to be involved in a community-wide effort to promote, support, and model such healthy behaviors and habits.

The Board sets the following goals in an effort to enable students to establish good health and nutrition habits:

- A. With regard to nutrition education, the District shall:
 1. Nutrition education shall be included in the sequential, comprehensive Health curriculum in accordance with the curriculum standards and benchmarks established by the State.
 2. Nutrition education shall include opportunities for appropriate student projects related to nutrition, involving, when possible, community agencies and organizations.
- B. With regard to physical activity, the District shall:
 1. **Physical Education**
 - a. A sequential, comprehensive physical education program shall be provided for students in K-12 in accordance with the standards and benchmarks established by the State.
 - b. Planned instruction in physical education shall be sufficient for students to achieve a proficient level with regard to the standards and benchmarks established by the State.
 2. **Physical Activity**
 - a. Physical activity and movement shall be integrated, when possible, across the curricula and throughout the school day.
 - b. Schools shall encourage families to provide physical activity outside the regular school day, such as outdoor play at home, participation in sports sponsored by

community agencies or organizations, and in lifelong physical activities like bowling, swimming, or tennis.

- c. On an annual basis, physical education teachers shall review and affirm receipt of the Ohio Department of Health's concussion information sheet.
- d. Physical Education teachers shall remove from class participation any student who exhibits signs, symptoms, or behaviors consistent with having sustained a concussion or head injury. The Principal and/or teacher shall notify parents or guardians about the possible concussion or head injury.
- e. Any student who has been removed from physical education class participation because s/he has exhibited signs, symptoms, or behaviors consistent with having sustained a concussion or head injury shall not be permitted to return to physical education class until the student's condition is assessed by a physician, and the physician gives the student written clearance that it is safe to return to class.

C. With regard to other school-based activities the District shall:

1. The schools shall schedule mealtimes so there is minimum disruption by bus schedules, recess, and other special programs or events.
2. The school shall provide attractive, clean environments in which the students eat.
3. The schools may demonstrate support for the health of all students by hosting health clinics and screenings and encouraging parents to enroll their eligible children in Medicaid or in other children's health insurance programs for which they may qualify.

D. With regard to nutrition promotion, the District shall:

1. encourage students to increase their consumption of healthful foods during the school day;
2. create an environment that reinforces the development of healthy eating habits, including offering the following healthy foods that comply with the USDA Dietary Guidelines for Americans and the USDA Smart Snacks in School nutrition standards:
 - a. a variety of fresh fruit to include those prepared without added fats, sugars, refined sugars, and sodium;
 - b. a variety of vegetables daily to include specific subgroups as defined by dark green, red/orange, legumes, and starchy;
 - c. whole grain products – half of all grains need to be whole grain-rich upon initial implementation and all grains must be whole grain-rich within two (2) years of implementation;
 - d. fluid milk that is fat-free (unflavored and flavored) and low-fat (unflavored);
 - e. meals designed to meet specific calorie ranges for age/grade groups;
 - f. zero percent trans-fat from school meals;
 - g. require students to select a fruit or vegetable as part of a complete reimbursable meal;

E. designate wellness champions at each school that will promote resources through the District's website for wellness for students, families and the community;

F. provide opportunities for students to develop the knowledge and skills for consuming healthful foods.

All foods and beverages sold to students as fund-raisers outside of the school meals program during the school day (defined as midnight before and thirty (30) minutes after the end of the official school day) for consumption on the school campus shall meet the USDA Competitive Food regulations, the Alliance for A Healthier Generation's Competitive Foods and Beverages Guidelines, and the USDA Smart Snacks in School nutrition standards.

Rewarding children in the classroom should not involve candy and other foods that can undermine children's diets and health and reinforce unhealthy eating habits. A wide variety of alternative rewards can be used to provide positive reinforcement for children's behavior and academic performance.

Furthermore, with the objectives of enhancing student health and well being, and reducing childhood obesity, the following guidelines are established:

- A. In accordance with Policy [8500](#), entitled Food Service, the food service program shall comply with Federal and State regulations pertaining to the selection, preparation, consumption, and disposal of food and beverages, including but not limited to the USDA Dietary Guidelines for Americans and the USDA Smart Snacks in School nutrition standards, as well as to the fiscal management of the program.
- B. As set forth in Policy [8531](#), entitled Free and Reduced Price Meals, the guidelines for reimbursable school meals are not less restrictive than the guidelines issued by the U.S. Department of Agriculture (USDA).

The sale of foods of minimal nutritional value in the food service area during the lunch period is prohibited.

- C. The sale of foods and beverages to students that do not meet the USDA Dietary Guidelines for Americans and the USDA Smart Snacks in School nutrition standards to be consumed on the school campus during the school day is prohibited.
- D. All food items and beverages available for sale to students for consumption on the school campus (any area of property under the jurisdiction of the school that is accessible to students during the school day) between midnight and thirty (30) minutes after the close of the regular school day shall comply with the current USDA Dietary Guidelines for Americans and the USDA Smart Snacks in School nutrition standards, including, but not limited to, competitive foods that are available to students a la carte or as entrees in the dining area (except entree items that were offered on the National School Lunch Program (NSLP) or School Breakfast Program (SBP) menu on the day of and the day after they are offered on the NSLP or SBP menu), as well as food items and beverages from vending machines, from school stores, or as fund-raisers, including those operated by student clubs and organizations, parent groups, or boosters clubs.
- E. The food service program will strive to be financially self-supporting; however, if it is necessary to subsidize the operation, it will not be through the sale of foods with minimal nutritious value.
- F. The food service program will provide all students affordable access to the varied and nutritious foods they need to be healthy and to learn well.

The Board designates the Superintendent and the building principals as the individual(s) charged with operational responsibility for measuring and evaluating the District's implementation and progress under this policy. The Superintendent shall develop administrative guidelines necessary to implement this policy.

The Superintendent shall appoint a District-wide Wellness Committee that includes parents, students, representatives of the school food authority, educational staff (including physical education teachers),

school health professionals, members of the public, and school administrators to oversee development, implementation, evaluation and periodic update of this policy. The Wellness Committee shall be an ad hoc committee with members recruited and appointed annually.

The Wellness Committee shall be responsible for review of the District's Wellness policy.

Before the end of each school year, the Wellness Committee shall recommend to the Superintendent any revisions to the policy it deems necessary and/or appropriate.

The Superintendent shall report annually to the Board on the Wellness Committee's progress and on its evaluation of the policy's implementation and areas for improvement, including status of compliance by individual schools and progress made in attaining the policy's goals.

The Superintendent is also responsible for informing the public, including parents, students and community members, on the content and implementation of this policy. In order to inform the public, the Superintendent shall distribute information at the beginning of the school year to families of school children; include information in the student handbook; post the policy on the District's website and provide press releases for the local news media.
